INSIDE SOLUTION

OFFICE

Tradition, Innovation & Design
by Rapid

All the way since 1936 Rapid has constantly improved the process of developing, manufacturing and marketing stapling and fastening. This has made us a specialist company on a global market. Today we are present in 120 countries and Rapid is a strong brand within the Esselte Corporation.

Rapid works in three business areas; OFFICE - staplers and hole punches in the office and at home, TOOLS – professional tools for building & construction as well as devoted repair and decoration at home, and finally INSIDE SOLUTIONS – insert stapling units for copiers and printers.

The Rapid brand stands on a solid foundation based on our three core values, expressed in everything we do; Tradition, Design & Innovation. Our ability to quickly respond and attend to our customers needs and the fact that we have control over the whole chain from development to sales, has made us market leader.

The market leadership is consolidated in our quality control made possible by having our own manufacturing and also by our devoted partners and distributors.

Rapid works for you in Research & Development, Production, Distribution, Marketing & Sales.

We make your day efficient.

The importance of comprehensive, day-to-day commitment

It is not easy to provide a relevant description of Isaberg Rapid's environmental work. Naturally, the company is accredited in accordance with ISO 14000, but there is much more going on, and at so many different levels - from the individual employee's choice of cycling instead of driving to work, to new research findings leading to the exclusion of hazardous substances from the manufacturing process, working actively with environmental issues is not about sitting back and being content with having invested in the world's most modern and environmentally friendly powder coating plant (which we have, of course, done). Instead, it's a matter of making daily improvements, as well as keeping up to speed on what is happening in environmental research and legislation.

RAPID ENVIRONMENT POLICY
As a manufacturer of stapling products, Isaberg Rapid AB shall be among the leaders when it comes to environmental issues. We shall aim at an ecological, sustainable development and thereby take responsibility for future environmental issues along with the sound financial operations.

THIS INVOLVES:
▪ Act according to relevant legislation, decrees, directions and other demands regarding the environment
▪ Act to reduce and prevent pollution and to strive to attain continuous improvements
▪ Aim at the efficient use of raw material and energy
▪ Reduce the use of hazardous substances by eliminating or replacing these by less harmful ones

CONCEPTS

STAPLING GUNS FOR YOUR EVERY NEED
Our stapling guns come in several different models for different areas of use. To make it easier for you, we've divided our stapling guns in three categories: professional users (PRO), do-it-yourself (HANDY) or hobbies (HOBBY).

PRO

PRO meets the day-to-day requirements of professional users and makes light work of a wide variety of jobs. Rapid's products also make for faster, more efficient work (which increases profitability). Our Pro products offer the reliability that is necessary for daily use in the building trade.

HANDY

HANDY gives do-it-yourselfers everything they need in tools for all the pressing jobs around the house. These versatile products are, with their ergonomic design, fast and efficient and made for the Handy user who want to improve their home with easy to use tools.

HOBBY

Rapid's **HOBBY** range sets no limits when it comes to home improvements. Quite the opposite! Rapid's Hobby range widens the scope. With Rapid, the only limiting factor is the imagination of the user.

SELECT THE STAPLES to suit your requirements

Decoration and finishing

Use fine wire staples when you need a less visible staple, for example when fixing textiles, fabrics, leather, decorative material, labels or posters.

Staple symbols for finewire | 13 | 53 |

Insulation and building jobs

Use a flat-wire staple when completing building and insulation work involving Skirting, PVC and Paperboards.

Staple symbol for flatwire | 140 |

Cable

Cable staples for securing low-voltage cables.

Staple symbols for cable | 28 | 7 | 36 |

Construction

Use narrow staples or brads for fixing through tough materials and where long depth is required. Particularly used for heavy-duty fixing, flooring, wood panelling, wall boards, frames, partitioning etc.

Staple symbols for narrow staples and brads | 606 | 8 |

inoX™ Stainless Edelstahl
Symbol for stainless steel staples

Stainless steel
Quality stainless steel staples for use when a durable staple is required in adverse conditions.

Symbol for DP staples

DP
Special line of staples designed with Divergent Point to provide the maximum strength between two parts fastened together.

General tips & trix when fixing

1/3
2/3 +5mm

1/2 1/3
1/2 2/3

4mm +6mm

Standard
In the standard case the staple should be three times as long as the material to be fixed.
For brads, add 5mm extra.

With resistant materials
For hard surfaces ensure that the staple length is twice that of the material you are fixing.
Brads should be three times as long as the material to be fixed.

Fine and light materials
When working with fine or light material, ensure that the staple length is 4mm longer than the material thickness. Brads should be 6mm longer than the thickness of the material to be fixed.

Airtac PS101, Case	5000051	4051661000577	1

Airtac - the new pneumatic range
– Finish big jobs quickly

CONSUMABLES – A strong link

No one knows better than Rapid how important the actual staples are to the stapling results. If a Rapid stapling tool jams, it is usually due to having been loaded with the wrong size staples or low quality staples. For best results, always use Rapid original staples. It is also worth remembering that there are different staples for different jobs.

FINE WIRE STAPLES Because they are made of fine wire, these staples are not so visible. Ideal for working in textiles, the fine wire has a minimal effect on the textile fibres. The hole left after removing these staples when masking off can be painted over without being covered with filler.

FLAT WIRE STAPLES Flat wire affords a larger holding area against the material. Suitable for plastic and other non-fibrous materials.

CABLE STAPLES Flat wire staples with a round crown for securing lowvoltage cables.

BRADS For carpentry. Available in versions without head (Rapid 9), with small head (Rapid 8/300), and a somewhat stronger version (Rapid 16) for heavier work.

NARROW CROWN STAPLES Works like a double brad for fixing through tough materials and where long depth is required. Particularly useful for heavy-duty fixing, flooring, wood panelling, wall boards, frames, partitioning, etc.

Fun to Fi x glue bag is a new version of package solution with standing and hanging functions and openable and closeable system. The bag contains 20pcs of 100mm transparent sticks Ø7.
▪ Each bag contains 80 gr of Coloured glue in several colours

Practical and Convenient

Using a glue gun and glue sticks has several benefits compared with using "ordinary" glue. One benefit is that glue sticks are non-toxic, which is reassuring for everyone, especially people with small children. The glue gun and glue stick method makes it simple to use the right amount of glue for the job, giving better adhesion and eliminating wastage. The glue sticks can be stored for many years without any deterioration in quality. Due to its non-toxic properties, avoids problems with keeping glue in the home.

HIGH TEMP

LEATHER : Glue those damaged shoes or that torn suitcase with our leather glue. Glues leather, suede and imitation leathers, such as nubuck, etc.

PVC/CABLE : For all PVC repairs. Secures cable, electrical wiring, fitted carpets, floor tiles, etc.

SANITARY : An excellent glue for tiles and ceramics. Also good as a sealer in bathrooms and other areas subjected to wet.

LOW TEMP

LOW TEMP : Low temperature glue for materials like glass, ceramics, and polystyrene. Useful for arts and craft, hobby and floral decorations.

METAL : Perfect when joining small metal items, jewellery, etc. Glues copper, pewter, brass, aluminium, iron, etc.

TEXTILE : Glue all textiles with our strong textile glue. Glues cotton, linen, suede, cork, etc.

WOOD : Glues wood, particle board, plywood, mouldings, balsa wood, melamine, laminated plastic, etc.

LOW TEMP GLITTER GLUE : An excellent glue for all types of decorations and heat sensitive materials. Useful for arts and craft, hobby and floral creations.

GLUE for all needs

The glue gun is the ultimate tool with many different uses – from craft activities to advanced technical uses. To get the best possible results for all applications we recommend the use of Rapid glue sticks.

For most home applications the multipurpose glue will give the best result. For advanced applications requiring a stronger and more robust bond, a suitable glue is required, purpose made to go with the materials that are to be joined. To find the most suitable glue for your application please see the table below.

When using hot glue we would make the following recommendations:
- Ensure the surfaces are clean, dry and free from grease, paint and varnish.
- Apply the glue to one surface only, this should be the least sensitive to variations in temperature.
- Apply the glue sparingly, a thinner layer will give a better bond.
- Avoid applying the glue to large areas and join the two layers to be bonded as soon as possible.
- Press together the joined surfaces.

High temperature glue

Name	Format	Usage	Application temperature	Softening point	Viscosity	Open time	Set time
GEN–T	Ø12	Transparent universal glue	160–200° C	81–84° C	6,5–8,5 Pa.s. at 200°	60 sec	30 sec
ECO–T	Ø12	Transparent universal glue	160–200° C	81–84° C	6,5–8,5 Pa.s. at 200°	60 sec	30 sec
ASS	Ø12	Wood, packaging, leather, cork and textile	170–190° C	80–96° C	1–3 Pa.s. at 200°	30 sec	30 sec
PRO–T	Ø12	PVC, plastic, cables, glass, porous material and fibrous material	160–200° C	81–84° C	6,5–8,5 Pa.s. at 200°	60 sec	30 sec
PRO+	Ø12	High performance applications. Multi purpose, metal, plastic, glass, wood and treated surfaces	170–190° C	80–96° C	1–3 Pa.s. at 200°	30 sec	30 sec
PAC	Ø12	Fast tack and packaging	170–190° C	101–109° C	1–3 Pa.s. at 200°	8 sec	3 sec
PRO–B	Ø12	White glue used for sanitary, cable and porous materials	170–190° C	80–96° C	1–3 Pa.s. at 200°	30 sec	30 sec

NOTE: The ambient conditions e.g. temperature can affect the bonding time and strength etc. Isaberg Rapid AB are constantly reviewing and improving their products, therefore we reserve the right to change the specification without warning.

HOT AIR

R2000 Pro

2000W
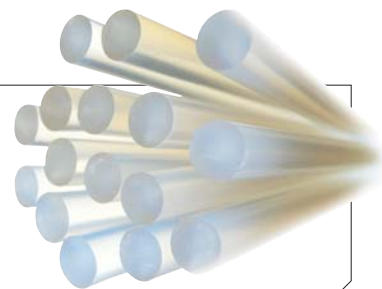

LCD display and temperature sensor for exact temperature control and air flow setting. Seven preprogrammed functions. Ideal for welding plastics and soldering.
▪ Over-heating protection
▪ Safe usage in self-standing position
▪ Cool Air Stage
▪ Carefully positioned centre of gravity
▪ Hanger
▪ Anti-Slip Soft Grip
▪ Variable temperature setting
▪ Ergonomic design
▪ LCD Display with memory function
▪ Seven preprogrammed application functions

Description	Article No	EAN Code	Units
R2000, Box	21147700	7313461477001	6

Regulator 2000

2000W

A hot air gun with graduated, stepless temperature control. Perfect for shrinking plastic pipes when doing plumbing work and for removing paint.
▪ Over-heating protection
▪ Safe usage in self-standing position
▪ Cool Air Stage
▪ Carefully positioned centre of gravity
▪ Hanger
▪ Anti-Slip Soft Grip
▪ Variable temperature setting
▪ Ergonomic design

Thermal 1600

1600W

User friendly hot air gun for all kinds of use around the home.
▪ Over-heating protection
▪ Safe usage in self-standing position
▪ Cool Air Stage
▪ Carefully positioned centre of gravity
▪ Perfectly balanced
▪ Hanger
▪ Two temperature- and air blow levels

Description	Article No	EAN Code	Units
Thermal 1600, Box	24359800	7313463598001	4

Glass Protection Nozzle

Description	Article No	EAN Code	Units
Glass Protection Nozzle 50 mm, Box	212149	7313462121491	5
Glass Protection Nozzle 75 mm, Box	24928600	7313469286001	5

This nozzle directs the jet of hot air and helps to prevent the glass from cracking as a result of overheating. The nozzle is also excellent for avoiding overheating when working in corners and other tight spaces.

Reduction Nozzle

Description	Article No	EAN Code	Units
Reduction Nozzle 9 mm, Box	24928500	7313469285004	5
Reduction Nozzle 20 mm, Box	212148	7313462121484	5

Reduces the width of the air jet all the way down to 20 mm, giving a narrowly directed heat jet. Very useful for glueing edges, soft soldering and removing paint in corners.

Reflector Nozzle

Description	Article No	EAN Code	Units
Reflector Nozzle, Box	212150	7313462121507	5

A very useful nozzle when soldering thin pipes, shaping PVC pipes or shrinking shrink tubes. Reflecting the hot air provides uniform heating all around the pipe.

Wide Slot Nozzle

Description	Article No	EAN Code	Units
Wide Slot Nozzle 45 mm, Box	212151	7313462121514	5
Wide Slot Nozzle 75 mm, Box	24928700	7313469287008	5

An all-round nozzle that gives a wide spread of hot air for drying surfaces, removing paint, repairing tarred roofing paper, shaping plastic etc.

Shrink Tubings Set

Description	Article No	EAN Code	Units
Shrink Tubings Set 2,5-10 mm, 34 pcs, Box	24947500	7313469475009	5
Shrink Tubings Set1 1,5-5,0 mm, 72 pcs, Box	24947400	7313469474002	5

Shrink tubings are used for shrinking onto cable terminals, breaks or looms mainly used together with the Reflector Nozzle.

GARDEN

GP238

Hog Ring
6–11–16mm

Description	Article No	EAN Code	Units
Garden Plier GP238, Clamshell	24311200	7313463112009	12

GP238 is the perfect tool to fix young plants, secure growing branches and attach a net. The tool can be locked in three different positions just enough to secure it without destroying the plant.
- Quick load magazine
- Lock for easy storage

Narrow work table (60 mm) with anvil.

R252/106 Stapling head for loop stapling (ring).

The pedal is ideal for precision stapling in industrial applications. Simple plug-in connection.

Special rail for saddle stapling with two or more 106E staplers.
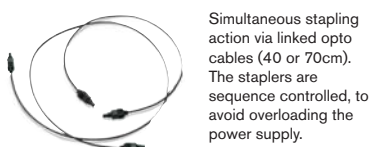

Simultaneous stapling action via linked opto cables (40 or 70cm). The staplers are sequence controlled, to avoid overloading the power supply.

The adjustable industrial multi base for mounting up to 4 staplers enables the staplers to be easily moved to another working area.

Vice (bench clamp) enables stapler to be firmly fixed to work-table if required.

High frequent usage will make the cutters to start waering. Get the precision back by replacing the removable punching cutters.

Shop presentations that will increase your sales

End users demand more information and advice. You have less time and resources to give it to them. That means products must be more or less self-instructing and self-selling; that will be one of the big differences between a premium brand and the competition.

This is why we are launching the Rapid Friendly Shopping program – a straightforward collection of packaging, point-of-sales materials and planogram ideas that will guide your customers in choosing the right products and increase turnover in your shop.

Packaging: an important source of end user information

Friendly Shopping starts with smart packaging. Our packaging has a system of symbols, text and images that work together to thoroughly explain the use of the product. Communication should clearly show a solution to the end user.

Touch & Feel blister packs

Blister packs for manual staple guns and glue guns – that is the Friendly Shopping concept spot on! The products' ergonomics can easily be tested due to the half-open package design and the exposed handle or trigger.

Staples

The end user information on the new staple packaging has been reworked to be clearer helping the end user choose the right staple for the job.

The slimmer design saves space allowing more packages in a single facing. This will decrease stock and boost turnover. End users look for staples actively. This means that product placement is not critical and does not have to be at eye level.

DIY activities

This product has been specially designed for various DIY activities.

Shop presentation

Regardless of market and other circumstances, the basic principles behind a good presentation should be the same. We would like to share our ideas for some Friendly Shopping presentations.
- Bestselling manual products should be placed roughly at eye level and up.
- Machines arranged from low price/low usage (Hobby, Handy) to high price/high usage (Pro) if possible. Hang from left to right.
- Higher priced units placed in the middle as often as possible.
- Stapling occupies roughly 70% of the available area. Vertical presentation.
- Products in large boxes at the lower part of the presentation.
- Consumables can be placed with the lower edge of the packaging at a height of approx. 190 cm above the floor.
- Presentation should include point of sales material that guides the end users, helping them choose the right product for their projects.

Displays

Separate displays for flexible presentation placement will be available.

Rapid© Friendly Shopping will always be adapted to your needs

No two stores are alike, so we made the Friendly Shopping concept adaptable! Almost no point-of-sales materials are in stock. Using a bank of core elements, we will practically custom make a presentation for you. It may take a little time, but it will be Your presentation.

SVENSK EFFIXITY

Put together the English words for **"efficiency"**, **"fixing"** and **"simplicity"**. Add **"Svensk"**, which means Swedish, and you will come up with the perfect description of Rapid®.
The Swedish fastening specialist that makes fixing easy and efficient!
